7800 El Camino Real, Colma CA 94014

Summary

Full stack software developer with passion for entertainment and technology. I have experience in business and brand management which makes me eager to apply these lessons to software engineering.

Skills

Technologies: Ruby, JavaScript, Ajax, jQuery, AWS, Heroku, HTML5, and CSS

Framework: Rails, Sinatra, and ReactJS

Methodologies: Git workflow, Agile Development, Test Driven Development using RSpec and Capybara, and Behavior Driven Development using Jasmine

Projects

Restaurant Roulette: <http://restaurant-roulette.herokuapp.com/>

Web/Mobile app for simplifying a group's answer to the question "Which restaurant should we eat at?"

Technologies Used: Rails, jQuery, Javascript, Yelp API, Twilio API, and Bootstrap

Personal Contributions: Architected the flow of data through RESTful routing conventions, JQuery, and Design of the App.

PreHack Enrollment Application: <https://github.com/gabrielfirmacion/prehack-application>

Web app that is used by a marketing start-up called PreHack for a step by step application for their potential students.

Technologies Used: Rails, Mailgun API

All In: <https://github.com/Money-20-20>

Mobile betting app that uses blockchain's api to create a fun way for people to learn about bitcoins.

Technologies Used: Rails, React-Native, and Blockchain API

No Potato Chrome Extension: https://github.com/gabrielfirmacion/potato_timer

A chrome extension that allows you to take a 5 minute break from your work and notifies you when your break is done.

Technologies Used: JavaScript and jQuery
